Project Notes

- ◆ E8/3866 - VT - Display BPM dates on vehicle details page
- ◆ E8/3842 - VT - Allow exclusion of options from value/invoice/postings
- ◆ E8/3841 - VT - Offer process - allow offer reference to be reused.
- ◆ E8/3807 - VT - Allow selected web processes to be terminated
- ◆ E8/3805 - VT - Show the 'Finance' payment first (IMS Web)
- ◆ E8/3797 - VT - Call REGREQ transition when requesting registration
- ◆ E8/3796 - VT - Backorders interm form to tick and untick orders
- ◆ E8/3795 - VT - Filter dealer locations by location category (IMS Web)
- ◆ E8/3787 - VT - Changes to dealer transfer process (IMS Web)
- ◆ E8/3783 - VT - Allow for auditing of data tables
- ◆ E8/3780 - VT - Other dealers vehicle display (IMS Web)
- ◆ E8/3776 - VT - Progress detail format changes (IMS Web)
- ◆ E8/3744 - VT - Facility to hide vehicles (IMS Web)
- ◆ E8/3703 - VT - Vehicle reservations facility (IMS Web)
- ◆ E8/3701 - VT - Dealer change password option (IMS Web)
- ◆ E8/3687 - VT - Allow comments to be entered on dealer orders (IMS Web)
- ◆ E8/3686 - VT - Allow amendment to dealer order details (IMS Web)
- ◆ E8/3683 - VT - Dealer stock locator control
- ◆ E8/3677 - VT - User defined fields in both activ and cases
- ◆ E8/3676 - VT - Function to return a specific invoice log record
- ◆ E8/3670 - VT - Enable/disable customer-specifics (IMS Web)
- ◆ E8/3642 - VT - Registration EDI - update date on MKvehic
- ◆ E8/3638 - VT - Reinstate payment method (IMS Web)
- ◆ E8/3625 - VT - Dealer order - Capture Dealer PO on order
- ◆ E8/3616 - VT - Exclude importer fit options when matching dealer order
- ◆ E8/3615 - VT - Exclude fit options when matching orders (IMS Web)
- ◆ E8/3518 - VT - Change VIN
- ◆ E8/3461 - VT - Revamp order / registration
- ◆ E8/3341 - SO - Dealer front end for parts (IMS Web)
- ◆ E8/3329 - VT - Automatic production of transport invoices
- ◆ E8/3294 - VT - Enhancements to VT/POS integration (Push/Pull)
- ◆ E8/3292 - VT - Colour code vehicle locator based on optional options
- ◆ E8/3196 - VT - Allow vehicle note entry from vehicle display
- ◆ E8/3106 - VT - Data Conversion - 7.4 to 8.35
- ◆ E8/3101 - VT - Reworking process
- ◆ E8/3100 - VT - Buybacks of Company Cars
- ◆ E8/3034 - VT - Allow change to case and vehicle options
- ◆ E8/2956 - VT - Homologation Changes
- ◆ E8/2947 - VT - Add registration number field to VT_cases
- ◆ E8/2815 - VT - Add date/time last amended fields to the case record
- ◆ E8/2787 - VT - Front End for Vehicle Tracking (IMS Web)
- ◆ E8/2661 - VT - Include RP code field on VT Active
- ◆ E8/2649 - VT - Supplementary dealers on-line in Vehicle availaibility
- ◆ E8/2600 - VT - Dealer terms used to calculate payment date
- ◆ E8/2592 - VT - Business report stock and sales
- Warranty
 - ◆ E8/4658 - WA - Record previous ACL number on claim
 - ◆ E8/4657 - WA - Receipts & submissions cater for chargebacks
 - ◆ E8/4076 - WA - Gowan used warranty policy change
 - ◆ E8/4054 - WA - Change for Brazilian parts
 - ◆ E8/4006 - WA - Project tidy-up issues (Kia NL)
 - ◆ E8/3990 - WA - Proton rejection process

Project Notes

- ◆ E8/3764 - WA - Renault NITG selection
- ◆ E8/3679 - WA - Technical codes display priority
- ◆ E8/3663 - WA - New plausibility check on campaign outstanding list.
- ◆ E8/3654 - WA - Initial templates
- ◆ E8/3639 - WA - Change terms to use the Warranty code from MKvehic
- ◆ E8/3572 - WA - Peugeot Battery test results upload
- ◆ E8/3564 - WA - Allow warranty summary chargebacks summary level
- ◆ E8/3561 - WA - Allow multiple text import on credit receipt
- ◆ E8/3544 - WA - Proton claim returns processing
- ◆ E8/3506 - WA - New quick claim rejection process
- ◆ E8/3486 - WA - Change to submission program for non Peu parts
- ◆ E8/3434 - WA - IMS Web Development
- ◆ E8/3395 - WA - Allow upload of dealer claims directly from PC
- ◆ E8/3253 - WA - Minor enhancements for Maan Auto
- ◆ E8/3209 - WA - Micellaneous Enhancements (Kia)
- ◆ E8/2591 - WA - New layout for upload of price file details
- ◆ E8/2502 - WA - Set-up Finland country code and FI products

Minimum Requirements

Autoline Rev8 minimum requirements

Please note: Certain features may incur additional licensing and additional implementation costs. Not all features may be installed as standard.

Connection Manager, offering greater reliability and functionality over telnet, is the only recommended connection method for systems running KCML6.

Available server memory (RAM) should be 18 MB per user. This increase from the prior recommendation of 16Mb is an incorporation of overall system overheads into a 'per user' measure.

Windows Vista, Windows XP SP2 and Windows 2000 SP4 are the only recommended operating systems for computers that run KClient.

There are issues with the extra security that Vista enforces that dictate that some products have to be installed with admin privileges. See www.kcml.com/vista.html

Microsoft Internet Explorer (included with the recommended operating systems) or another compatible web browser is required to display the online help (HTML).

For optimal screen displays, we suggest screen resolution be set to 1024 x 768.

KClient version 6.20.48.15051 is used on windows PCs for testing issues on branches 9304D or newer.

KCML version 6.20.48.15051 is used on test servers operating systems on branches 9304D or newer.

KClient setup file and KCML IMAGE files for all operating systems can be found on www.kcml.com/kcml/06.20/

Project Notes

For systems using a non-standard back-up method that creates a token file in /tmp on completion of the back-up, administrators should be aware that the system now uses \$WORKSPACE instead of /tmp. Please refer to your Technical Consultant to ensure that changes have been made to accommodate this.

CRM and OCX integration with Outlook requires MS Office XP otherwise known as MS Office 10 or MS Office 2002 or later to be installed.

The use of the integrated telephony products in Autoline requires a CAS client (minimum version 2.70.3000 build 1001) to be installed in addition to KClient on the user workstation (PC).

A program such as Adobe® Reader is required to display Acrobat (PDF) documents.

ADP Print Viewer is required. It is available via the ADP downloads web site: www.adpdsionline.com

For SMS support you need: ADP Print Manager, an SMS licence, and a suitable SMS device and Sim Card attached to the Print Manager server.

Note: Microsoft®, Windows®, Windows XP SP2®, Windows 2000 SP4®, Windows Vista®, Outlook®, MS Office XP®, MS Office 10®, MS Office 2002®, Windows Mobile 5®, OCX®, and Connection Manager®, are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries. Adobe® and the Adobe logo are trademarks or registered trademarks of Adobe Systems Incorporated in the United States and/or other countries. ABBYY® Scan is a registered trademark of the ABBYY Group of companies, P.O. Box #54, Moscow, Russia, 129301 and/or other countries. Microcat® is a registered trademark of Infomedia® Ltd, 357-373 Warringah Road Frenchs Forest NSW 2086 Australia.

PDA System Requirements:

Windows Mobile 5 device must have at least:

- * 128Mb ROM
- * 64Mb memory (RAM)
- * Wi-Fi CERTIFIED® e.g. Support for LAN 802 11b/g and WPA2 encryption
- * GPRS (only required for Mobile Mechanic product)
- * Ruggedized hardware
- * Keyboard
- * Minimum of 2.8 inch screen and QVGA (240 x 320) colour

Franchise Data

E8/2670 - Homologation code is too short.

Release Notes

Description:

No release notes or help files are required for this enhancement as the only change is that Homologation code field has been lengthened from 15 to 25 characters

Manufacturer Systems

FS/403 - Kroymans - CAT Sales Invoicing upgrade from 8.23 to 8.35

Release Notes

Navigation:

MS > Cadillac Europe > CAT Interfaces

Description:

Upgrade the MS | CE | CAT Sales invoice process from 8.23 to 8.35, including the interface of the Sales details to 8.23 Warranty sales log

Introduced from:

Rev8:35.9304E

Technical (CVS etc.)

E8/4628 - IMS - Add VT & WA standard data to build program

Release Notes

Navigation:

Utilities > Make Modules

Description:

The make modules build program enables data-sets to be selected (examples include UK standard, Irish standard). IMS division has created its own set of standard data and requires that IMS standard data be available to be selected by the user.

Introduced from:

Rev8.35.9304E

Installation and training information:

- Database change required
- On-site testing required
- System restart required

Vehicle Tracking

R8/54036 - VT - Format stationary K05 commit

Release Notes

Navigation:

VT > Format Stationery K05

Description:

Enhance standard FS document K05 to have document archive data items, as used within document archive retrieval.

Introduced from:

Rev8.35.9304E

Installation and training information:

- Database change required
- On-site testing required
- System restart required

R8/53782 - VT - Completion Project - VT issues

Release Notes

Navigation:

IMS Vehicle Tracking

Description:

Enhancements to numerous Vehicle tracking programs to align the system with Completion Help project

Introduced from:

Rev8.35.9304E

Installation and training information:

- Database change required
- On-site testing required
- System restart required

R8/50857 - VT - Complete Reworking - Toolbar Functions

Release Notes

Navigation:

VT > PDI and Logistics > Complete Rework

Description:

Currently the complete rework program uses the file menu to select the functions of (a) selecting the rework batch number and (b) moving selected vehicles from rework. The functions should also be available via a toolbar image.

Introduced from:

Rev8.30.9304E

R8/50856 - VT - Create Reworking Batch - Toolbar Functions

Release Notes

Navigation:

VT > PDI and Logistics > Create Rework Batch

Description:

This enhancement provides the following file bar options: From/To variants, Rework selected vehicles, Legend (currently accessed via the legend menu bar option).

They need to be available via toolbar image functions.

Introduced from:

Rev8:30.9304E

R8/50700 - VT - Back Order Release - Run Mode Buttons

Release Notes

Navigation:

VT > Purchasing and Receipts > Back Order

Description:

Vehicle Tracking back order release uses the file bar option called "Run Mode" to assist the selection of the program's mode of running: Clear back orders against shipment/Clear back order against progress.

The functions should be available using the toolbar buttons.

Introduced from:

Rev8:30.9304E

Installation and training information:

- User training required

R8/44405 - VT - Archived vehicles show no history or documents

Release Notes

Navigation:

IMS > Vehicle Tracking > Archive Vehicles

Description:

There is a VT enhancement to ensure that archived vehicles have the correct link to the document archive system (AK), thereby enabling the display of transactional documents and history.

Introduced from:

Available from 9304E

R8/42004 - VT - 2 dealers on one order

Release Notes

Navigation:

VT > Availability grid

Description:

No release notes necessary

Informed Arjen - requested they confirm we close the issue.

Introduced from:

Rev8:35.9304E

E8/5022 - VT - Retrospective credits (Lexus)

Release Notes

Navigation:

Vehicle tracking > Sales invoicing > Retrospective debits and credits

Description:

This development introduces the additional concept of applying retrospective credits based up variable percentage margin as established within the price maintenance process.

Introduced from:

Rev8.35.9304E

Installation and training information:

- On-site testing required

E8/4922 - VT - Dealer visibility (IMS Web)

Release Notes

Navigation:

IMS_WEB > Vehicle availability > Dealer transfer

Description:

Enhanced functionality to provide a list of dealers available based upon valid users with access to the current module/company

Introduced from:

Rev8.35.9304E

Installation and training information:

- On-site testing required

E8/4921 - VT - B/O Clearance & Maintian Shipment filters

Release Notes

Navigation:

Vehicle tracking > Purchasing and receipts

Description:

This introduces additional filtration criteria to the Back Order Clearance and Maintain Shipment programs

Introduced from:

Rev8.35.9304E

E8/4627 - VT - Change to VRT calculation for Hybrid vehicles

Release Notes

Navigation:

Country Specifics > IE > VRT table

Description:

This introduces changes to the calculataion used for Irish VRT rules

- Add a new field to the VRT table called 'Reduction amount'
- If this exists then deduct this from the % calculated VRT.

The flat rate minimum will be relevant after the calculation and reduction.

Introduced from:

Rev8.35.9304E

Installation and training information:

- Database change required
- On-site testing required
- System restart required

E8/4606 - VT - Approval of factory orders

Release Notes

Navigation:

Vehicle tracking > Lexus options > Miscellaneous api

Description:

Functionality has been added to the vehicle approved monthly orders process: A password (PIN)-protected option has to be activated. This summarises the order quantities and allows the order to be confirmed before the final, full specification order is transmitted.

Introduced from:

Rev8.35.9304E

Installation and training information:

- On-site testing required

E8/4198 - VT - Help Guide Functions

Release Notes

Navigation:

VT > Various functions.

Description:

This development identifies help files and ensures that all functional Help buttons call the correct helpfile names and activate the HTML Help documents.

Introduced from:

Rev 8:35.9304E

Help file changes:

New Help files available

Installation and training information:

- Database change required
- On-site testing required
- System restart required

E8/4122 - VT - SIMI upload required for Ireland

Release Notes

Navigation:

Vehicle tracking > Data exchange

Description:

The 8.35 SIMI registration upload process is to be same as the 8.23 SIMI process, maintaining VT and CRM vehicle registration date and license plate numbers.

Introduced from:

Rev8.35.9304E

E8/4021 - VT - Automatic retrospective credits

Release Notes

Navigation:

Vehicle tracking > Model variant maintenance > Define retrospective credits

Description:

New functionality has been added to the retrospective credits process. It allows automatic batched generation of credits without the need for the dealer/central user's having to claim the credit.

Introduced from:

Rev8.35.9304E

E8/4016 - VT - Enhancements to inter company transfers

Release Notes

Navigation:

Vehicle tracking > Sales invoicing > Inter Company Transfer

Description:

Functionality has been added that enables the creation of a new vehicle transfer, cancelation of a transfer and the multiple transfer of a vehicle from within the Intercompany transfer facility.

Introduced from:

Rev8.35.9304E

Help file changes:

VT_INTFR_INTCOMPTR.html

Installation and training information:

- Database change required
- On-site testing required
- System restart required

E8/4007 - VT - Allow users to be flagged as display-only (IMS Web)

Release Notes

Navigation:

IMS > Web > VT

Project Notes

Description:

Allow a web user to be flagged as a display-only user within the web application.

Introduced from:

Rev8.35.9304E

E8/4005 - VT - Launch a specific web page from an application menu

Release Notes**Navigation:**

Vehicle tracking > Desktop

Description:

This introduces additional functionality to allow a website to be called from within the client desktop menu. The URL is set up using menu editor and then pulled onto desktop for selected user.

Introduced from:

Rev8.35.9304E

E8/3996 - VT - Registration mandatory fields (IMS Web)

Release Notes**Navigation:**

IMS_Web > Vehicle tracking > Registration

Description:

This introduces a single process for the entering of vehicle registration and customer details in the IMS_Web Vehicles program.

Introduced from:

Rev8.35.9304E

E8/3991 - VT - Natis registration changes

Release Notes**Navigation:**

VT > Data exchange

Description:

This is a development to enable dealers to register vehicles with NATIS release and Manufacturer Certificate document via email in a PDF format.

Introduced from:

Rev8:35.9304E

E8/3963 - VT - Add the process id to the web log table (IMS Web)

Release Notes

Navigation:

IMS > Web > VT

Description:

This enhancement writes the SOAP server's process id to the web request log table (VT_weblg).

Introduced from:

Rev8.35.9304E

E8/3875 - VT - Transfer display of original consignment date (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking > Dealer transfer

Description:

This enhancement displays the original consignment date on the dealer transfer pages in the IMS_Web Vehicles module.

Introduced from:

Rev8.35.9304E

E8/3866 - VT - Display BPM dates on vehicle details page

Release Notes

Navigation:

IMS_Web > Vehicle tracking

Description:

This enhancement displays the BPM requested and acknowledgement dates on the vehicle details page in the IMS_Web vehicle tracking program.

Introduced from:

Rev8.35.9304E

E8/3842 - VT - Allow exclusion of options from value/invoice/postings

Release Notes

Navigation:

Vehicle tracking > Miscellaneous menu > Sales types

Description:

This enhancement introduces functionality that controls the visibility of option types within the Vehicle availability Value tab, invoice prints and invoice logs, based up a new parameter within the sales type record

Introduced from:

Rev8.35.9304E

Help file changes:

GB_EDIT_VT_salestype

Note:

Please ensure you review the development Handout documentation (Note)

Tip:

Please ensure you review the development Handout documentation (Tip)

Installation and training information:

- Database change required
- On-site testing required
- System restart required

E8/3841 - VT - Offer process - allow offer reference to be reused.

Release Notes

Navigation:

VT > Purchasing and receipts > Manufacturer orders

Description:

This enhancement enables the offer sheet number to be used on more than one manufacturer's order.

Introduced from:

Rev8:35.9304E

Installation and training information:

- Database change required

E8/3807 - VT - Allow selected web processes to be terminated

Project Notes

Release Notes

Navigation:

Vehicle tracking > Internet services > View current web sessions

Description:

This enhancement enables web processes displayed in the "View current web sessions" function to be selectively terminated and also incorporates new filter by date selection criteria.

Introduced from:

Rev8.35.9304E

E8/3805 - VT - Show the 'Finance' payment first (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking

Description:

This amendment ensures that the "Finance payment method" is displayed as the first (default) dropdown payment method option.

Introduced from:

Rev8.35.9304E

E8/3797 - VT - Call REGREQ transition when requesting registration

Release Notes

Navigation:

VT > Vehicle availability > Registration

Description:

This change ensures that the REGREQ transition tag is always called from the vehicle tracking registration process

Introduced from:

Rev8.35.9304E

E8/3796 - VT - Backorders interm form to tick and untick orders

Release Notes

Navigation:

VT > Purchasing and receipts > Back order clearance

Project Notes

Description:

There is a Backorder form to enable you to select or deselect orders, so that not all orders are converted to a manufacture order.

Introduced from:

Rev8:35.9304E

E8/3795 - VT - Filter dealer locations by location category (IMS Web)

Release Notes**Navigation:**

IMS_Web > Vehicle tracking

Description:

This enhancement enables the filtration of the dealer location available dropdowns by application context (for example Vehicles or Parts) in the IMS_Web Vehicles and Parts modules

Introduced from:

Rev8.35.9304F

E8/3787 - VT - Changes to dealer transfer process (IMS Web)

Release Notes**Navigation:**

IMS_Web > Vehicle tracking > Dealer transfer

Description:

This introduces new functionality to the vehicle transfer process that requires user confirmation of the vehicle transfer from and vehicle transfer to locations.

1. Transfer initiation - The owning dealer needs to be able to specify the current location of the vehicle, i.e. the location from where the vehicle is to be collected when the transfer is effected.
2. Transfer confirmation - The requesting dealer also need to be able to specify a destination location when confirming the transfer.
3. Transport request flag required in the dealer transfer function: the receiving dealer should be able to request transportation of the vehicle when confirming the transfer.

Introduced from:

Rev8.35.9304E

E8/3783 - VT - Allow for auditing of data tables

Release Notes

Navigation:

Vehicle Tracking >

Description:

There is a facility to audit changes to tables such as dealer orders and vehicle specifications.

Introduced from:

Rev8.35.9304E

Installation and training information:

- Database change required

E8/3780 - VT - Other dealers vehicle display (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking

Description:

Functionality has been added that enables the display of vehicles belonging to other dealers within the IMS_Web Vehicles program.

Introduced from:

Rev8.35.9304E

E8/3776 - VT - Progress detail format changes (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking

Description:

This enhancement makes various changes to the format of the progress detail grids in the IMS_Web Vehicles program.

Introduced from:

Rev8.35.9304E

E8/3744 - VT - Facility to hide vehicles (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking

Description:

This introduces functionality to the vehicle locator that enables/disables the display of dealer selected vehicles to other dealers.

Introduced from:

Rev8.35.9304E

Installation and training information:

- Database change required

E8/3703 - VT - Vehicle reservations facility (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking

Description:

Enhancement to ensure that when you call off a vehicle, you are prompted to reserve or order the vehicle if the dealer is allowed to reserve vehicles.

Introduced from:

Rev8.35.9304E

E8/3701 - VT - Dealer change password option (IMS Web)

Release Notes

Navigation:

IMS > Web > VT

Description:

This introduces a Change Password button within the front page of the IMS-web function.

Introduced from:

Rev8.35.9304E

E8/3687 - VT - Allow comments to be entered on dealer orders (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking > Dealer orders

Description:

This enhancement introduces the facility to enter comments when creating dealer orders within the IMS_Web Vehicles application.

Introduced from:

Rev8.35.9304E

E8/3686 - VT - Allow amendment to dealer order details (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking > Dealer order

Description:

This introduces changes to the IMS_Web vehicle tracking system that enables the maintenance of the following data.

1. Sales type
2. Registration request flag
3. Comments
4. Delivery address
5. Request transportation flag
6. Sold/unsold flag
7. Hide from other dealers flag

Introduced from:

Rev8.35.9304E

E8/3683 - VT - Dealer stock locator control

Release Notes

Navigation:

Vehicle tracking > Vehicle availability > Ordering

Description:

Enhancement to enable the parameter controlled display of Unsold vehicles that remain in dealer stock and are available to be shown to other dealers during the order creation process with the Vehicle Locator.

Introduced from:

Project Notes

Rev8.35.9304E

Installation and training information:

- Database change required
- On-site testing required
- System restart required

E8/3677 - VT - User defined fields in both activ and cases

Release Notes

Navigation:

Vehicle tracking > Miscellaneous menu > Alternative field descriptions

Description:

Enhancement to enable the multiple recording of customer and descriptions per customer site against the vehicles case and active vehicle.

Introduced from:

Rev8.35.9304E

Installation and training information:

- Database change required

E8/3676 - VT - Function to return a specific invoice log record

Release Notes

Navigation:

Vehicle tracking > KCML Routine

Description:

New programmed function that can be called from KCML or Repgen to locate and return a specific record from the VT invoice log file.

Introduced from:

Rev8.35.9304E

E8/3670 - VT - Enable/disable customer-specifics (IMS Web)

Release Notes

Navigation:

IMS > Web > VT

Description:

This enhancement implements functionality in the Web-IMS product to enable or make unavailable

Project Notes

customer-specific functionality, depending on the customer or business to which the web user belongs.

Introduced from:

Rev8:35.9304E

E8/3642 - VT - Registration EDI - update date on MKvehic

Release Notes

Navigation:

VT > Data Exchange

Description:

Where the vehicle Warranty start date is reported to the Manufacturer, a registration file is produced (known as an MRDS file). To enable easier reporting on the vehicles registered with the Manufacturer, an MRDS date is recorded on the vehicle record.

Introduced from:

Rev8:35.9404E

E8/3638 - VT - Reinstate payment method (IMS Web)

Release Notes

Navigation:

IMS_Web > Vehicle tracking > Order

Description:

Reinstatement of the Payment Method control located within the Create Vehicle Order page of the IMS_Web Vehicles application.

Introduced from:

Rev8.35.9304E

E8/3625 - VT - Dealer order - Capture Dealer PO on order

Release Notes

Navigation:

VT > System maintenance > System parameters

Description:

There is a new VT parameter to control entry, Dealer Order Entry. The options are as follows:

- 0 - Unused (make field unavailable)
- 1 - Optional (enable at all times)
- 2 - Mandatory (cannot save an order if not entered)

Project Notes

3 - Mandatory Non-Editable (cannot save an order if not entered, and make unavailable in order amendment)

Introduced from:

Rev8:35.9304E

E8/3616 - VT - Exclude importer fit options when matching dealer order

Release Notes

Navigation:

VT > System maintenance > System parameters

Description:

There is a new VT parameter, "Option types", to exclude when matching vehicles. The new parameter enables you to modify the dealer order locator to exclude designated option types.

Introduced from:

Rev8:35.9304E

Installation and training information:

- System setup required
- User training required
